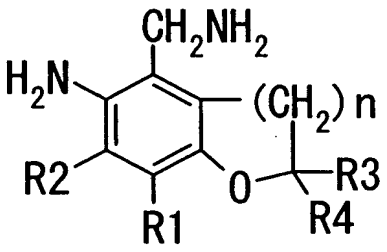
CLAIMS

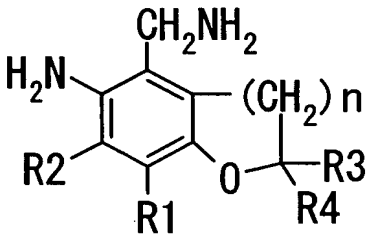
1. A compound represented by formula (1):



(1)

(wherein, R1, R2, R3 and R4 respectively and independently represent a hydrogen atom or a C_{1-6} alkyl group, and n represents an integer of 1 or 2).

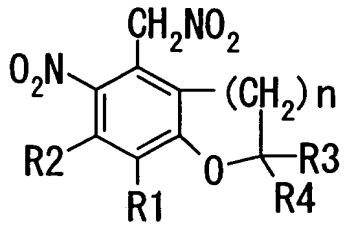
2. A production process of a compound represented by formula (1):



(1)

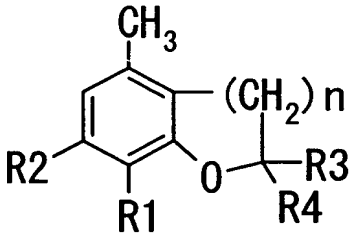
(wherein, R1, R2, R3, R4 and n are the same as previously defined) comprising:

a step 1 in which a compound represented by formula (3):



(3)

(wherein, R1, R2, R3, R4 and n are the same as previously defined) is obtained by nitrating a compound represented by formula (2):

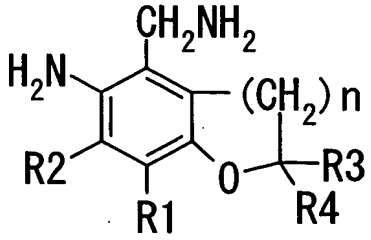


(2)

(wherein, R1, R2, R3, R4 and n are the same as previously defined); and,

a step 2 in which the resulting compound is converted to an amino group using a reducing agent.

3. An antioxidant characterized by comprising as its active ingredient at least one compound represented by formula (1):



(1)

(wherein, R1, R2, R3, R4 and n are the same as previously defined) or pharmaceutically acceptable salt thereof.

4. A kidney disease, cerebrovascular, or circulatory disorder treatment agent characterized by comprising the antioxidant according to claim 3.

5. A cerebral infarction treatment agent characterized by comprising the antioxidant according to claim 3.

6. A retinal oxidation disorder inhibitor characterized by comprising the antioxidant according to claim 3.

7. A retina disorder inhibitor according to claim 6 for age-related macular degeneration or diabetic retinopathy.

8. A lipoxygenase inhibitor characterized by comprising the antioxidant according to claim 3.
